

Course:
Creating Web Pages with HTML5 and CSS3

Module 10. Forms. Frames

Task 1

Implement an HTML page with the login form.

The form consists of username and password fields and a button. The **forgot password** link is below the form. And social media icons to sign up with should be below the link.

The required icons are attached to this PDF file.*

Task 2

Implement an HTML page with a message sending form.

It consists of the following fields:

- first and last names;
- email address;
- phone number;

- message subject;
- message input box.

The form background must be transparent, like in the Screenshot below.

Choose the background image on your own.

Example of the result:

Contact form

Please fill in your information and we'll be sending your order.

Your name

Your email

Phone *

Message subject *

Message *

Task 3

Implement an HTML page with flights selection.

The page must consist of these blocks:

- header;
- search criteria (departure city, arrival city, departure date, arrival date, and travel class);

Practice No.1

- filters (number of stops, price, airlines);
- list of flights (every flight has the airline name, time of departure, flight duration, time of arrival, and price).

Your task is only to lay out the page.

The search and filters must not work because you are learning only HTML and CSS at the moment.

The required icons are attached to this PDF file. *
